Our Bespoke Training Centre

- Custom designed with care, to enhance your comfort and learning experience
- State of the art, custom built, dental training facility with 18 Phantom Head Stations
- Our £3 million bespoke training centre — OUR PLACE — is designed with comfort, precision, and technology at its core.
 - 18 state-of-the-art phantom head stations
 - Luxury seating for 25 delegates
 - Multiple 100- and 75-inch high-definition displays
 - BOSE surround sound and zonal audio
 - LED mood lighting and air conditioning
 - Hands-on workstations for tabletop exercises
 - Live-streaming facilities for real-time demonstrations between clinic and training rooms
- 7 minute walk from Stanmore underground station
- Nearby free parking for delegates

Our Values

PRACTICALS

All our courses are
> 75% hands on
and some involve LIVE patients

CLINICAL EXCELLENCE

Evidence based knowledge with
the mutual goal of achieving
clinical excellence

We want YOU to have the
flexibility of attending external
courses. These speakers run
some of the best courses in the
country.

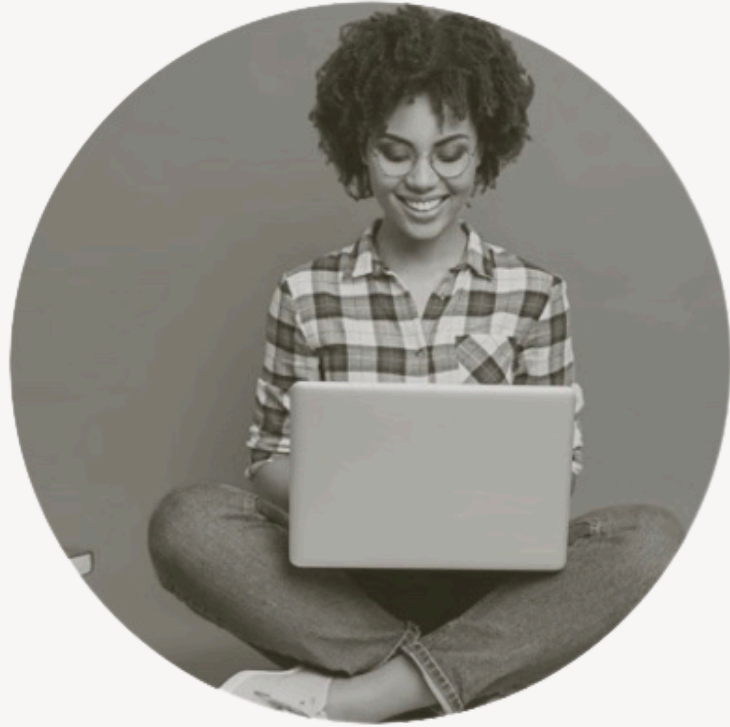

MAXIMISED LEARNING

Each teaching days are
maximised for your learning, by
starting at 8am and finishing
between 6pm - 630pm

Small groups of **12-14** delegates
at most.

Unlimited support during and
after the course

Our Values

FLEXIBLE LEARNING

Book courses at your convenience;
no fixed days, choose dates that work for you.

Complete the diploma within two years of registration

MAKE PREVIOUS COURSES COUNT

Courses that you have done in the previous 24-months will count

So you don't need to do them again!

NO EXAMS

We believe the best way of learning is via reflective learning.

Therefore you will be required to submit cases you have treated for each of the courses showing what went well and what could be done better.

Support

- Weekly online case discussions (every Wednesday, 9–10 pm)
- Dedicated WhatsApp support for ongoing clinical queries
- Private Facebook alumni community for networking & collaboration
- In-person case discussions after every course
- Regular webinars, study clubs, and clinical updates
- Personalised 1-to-1 mentorship for support with complex cases, complaints, job applications and references

Course Structure

- **Duration:**
 - **25 days** of immersive learning, with each session running from **08:00 to 18:00** to ensure maximum educational value
- **Flexibility:**
 - There's no fixed cohort — you have the freedom to choose course dates in any order, allowing you to tailor your learning journey around your schedule and interests
 - Course dates can be seen under our short courses section
 - Any of the ACE or external affiliated courses completed within the last two years will count towards the diploma
 - We can guide you on which external courses to register for, based on your experience, location and previous delegate feedback
- **Affiliation:**
 - We collaborate with select external partners to give you access to leading experts and the highest quality of teaching
- **Format:**
 - Delivered through face-to-face sessions in small groups, complemented by pre-course video content. Over 75% of the programme is hands-on, including live patient training
- **Location:**
 - All sessions take place in our bespoke training centre in Stanmore, London.
 - The location of the external courses may vary, giving you the choice to attend a course local to you

Fee Structure

Diploma registration: £350

The overall cost for **25 days** will range between £12,000 + VAT (£14,400) but not exceeding
£14,000 + VAT (£16,800)

(The course fee range above depends on which external course you may end up choosing)

The overall cost of the diploma will be cheaper if you have completed any of the ACE or
external affiliated courses within the last 2 years

0% interest free payment plan can be arranged

Refer a friend and receive a **£100 voucher** as a token of our appreciation

Assessments

Reflective Learning Log and Case Portfolio

Delegates are expected to compile a case portfolio that highlights their clinical cases, including photographs, the rationale behind treatment choices, and the decision-making process for each module. Reflective comments should also be included, outlining what went well and areas for improvement.

Templates for each module will be available through our diploma portal once you have registered.

We encourage delegates to present two completed cases during the Wednesday night case discussions over the two-year period.

There are no essays, MCQs, or formal assessments. Our approach focuses on applying the knowledge gained from the courses directly to patient care.

01

Treatment Planning

I - DAY
COURSE

Part I – The Patient Journey Series

- Learn proven strategies to increase private practice growth and case acceptance
- Discover a structured approach to effective and predictable treatment planning
- Elevate your new patient experience and streamline clinical check-ups
- Phasing and sequencing treatment plans
- Harness digital and AI tools for efficient record-keeping and communication
- Confidently phase, sequence and present comprehensive treatment options
- Engage in interactive clinical discussions and receive feedback on your own cases
- Integrate photography, CBCT and intra-oral scanning into your planning workflow

02

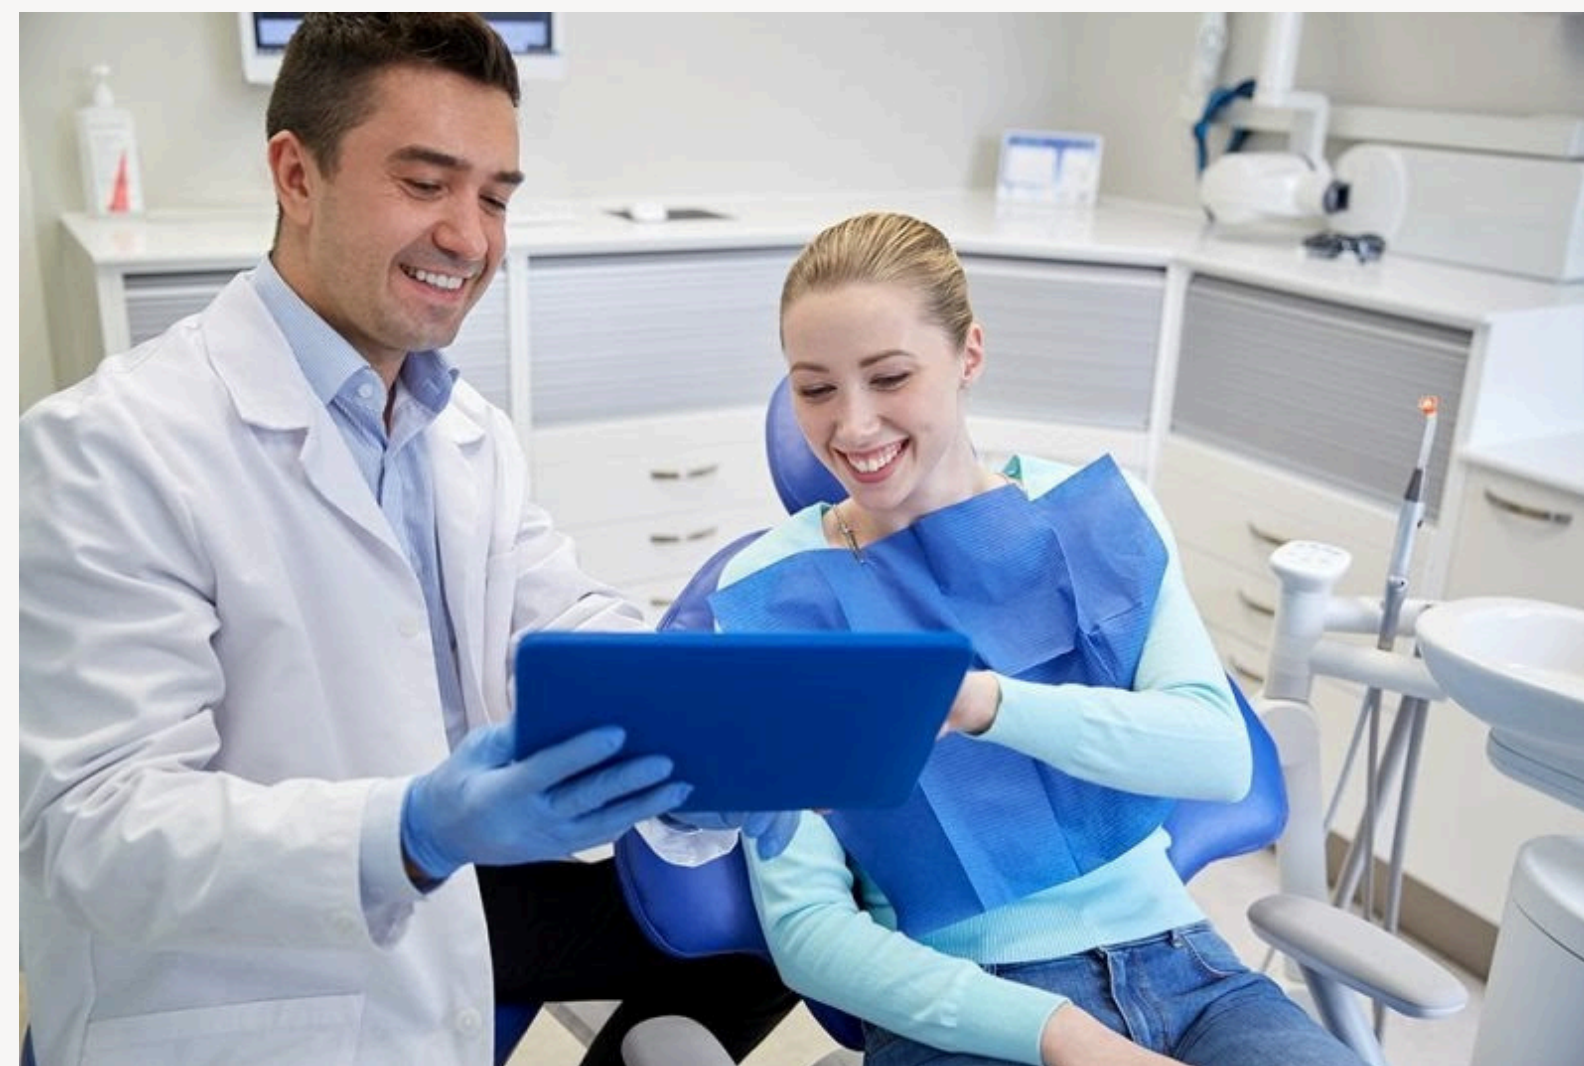

Communication

1 - DAY
COURSE**Part 2 – The Patient Journey Series**

Master the Art of Patient-Centred
Communication

Transform the way you connect, communicate,
and build trust with your patients.

- Learn effective communication strategies that inspire patient confidence
- Strengthen co-diagnosis conversations through collaborative decision-making
- Turn consent into a positive, transparent and ethical discussion
- Manage challenging conversations with empathy and professionalism
- Practise real-world scenarios to refine your communication style
- Empower your team to deliver an exceptional patient experience

03

Photography, Smile Design & Whitening

1 - DAY
COURSE

Part 3 – The Patient Journey Series

Transform clinical photography, digital smile design and whitening protocols into your practice advantage.

- Master DSLR setup and camera settings: twin vs ring flash, ISO, f-stop, shutter speed and white balance.
- Capture baseline, treatment and shade-matching photographs with precision — including photo editing and storage best-practices.
- Explore advanced shade-matching techniques: hue, value, chroma, diffusers and polarising filters.
- Implement digital smile design (DSD) workflows: integrate intra-oral scanners, CBCT scans and software tools (PowerPoint/Keynote).
- Learn appropriate whitening protocols: consent, gel concentrations, tray design and the “ABC” concept.
- Engage in a 1-day immersive, hands-on training: > 75% practical focus.

04

Occlusion

Our flagship 3 day course all about practical occlusion with live hands on

- Deepen your understanding of occlusion and apply practical skills directly in your practice.
- Gain evidence-based theory: centric relation, TMJ/muscle assessment, face-bow usage and splint indications.
- Perform hands-on sessions: TMJ examinations, occlusal registers, face-bow recordings, live patient treatment to include provision of a michigan splint.
- Translate occlusal principles into everyday cases: wear management, interferences, implant occlusion, restorative materials.
- Small-group format with live patient treatment over 3 full days—intensive experiential learning.

3 - DAY
COURSE

05

Tooth Wear

Master the Management of the Worn Dentition
Upgrade your clinical confidence in diagnosing, planning and treating tooth surface loss.

- Watch a 1.5 hour pre-recorded video to prepare you for the live day.
- Learn our signature 10-step formula to systematically manage every tooth wear case.
- Apply the complete **10-step pathway** across 7-10 real case studies for practical learning.
- Develop strategies for patients with limited finances, including alternative treatment pathways.
- Explore critical clinical considerations: orthodontics/aligners in tooth wear, crown lengthening, the Dahl concept, material selection and splint choice.
- Bring your own cases (photos & radiographs) for discussion and 1-to-1 advice.

I - DAY
COURSE

06

Anterior Composites

Complete 2 days with any one of the 4 choices below:

- ACE Courses (1 day rubber dam course AND 1 day composite bonding course)
- Dipesh Parmars MiniSmile makeover course
- Andrew Chandrapals anterior composite course
- Thomas Tahas anterior composite course

2 - DAY
COURSE

1

Rahul Shah

Sawan Kotecha

Affan Saghir

You will be required to do two ACE courses: (1) 1- day composite bonding course with Dr Affan Saghir, and (2) 1-day Rubber Dam course with Drs Rahul Shah and Sawan Kotecha, to meet the requirements of this module.

This course will also be eligible towards the diploma if you have completed it within the last two years.

3

Andrew Chandrapal

This course will also be eligible towards the diploma if you have completed it within the last two years.

2

Dipesh Parmar

Mini Smile Makeover course

This course will also be eligible towards the diploma if you have completed it within the last two years.

4

Thomas Taha

This course will also be eligible towards the diploma if you have completed it within the last two years.

07

Posterior Composites

2 - DAY
COURSE

Complete 2 days with
any one of the 3 choices
below:

- Andrew Chandrapal's
posterior composite
course
- Thomas Tahas
posterior composite
course
- Vishaal Shah's
posterior composite
course

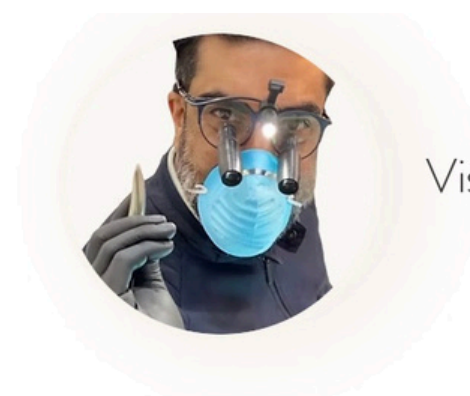

1

Andrew Chandrapal

This course will also be eligible towards the diploma if
you have completed it within the last two years.

3

Vishaal Shah

This course will also be eligible towards the diploma if
you have completed it within the last two years.

2

Thomas Taha

This course will also be eligible towards the diploma if
you have completed it within the last two years.

08

Veneers

I - D A Y
C O U R S E

**Master aesthetic veneer workflows with confidence
Elevate your anterior cosmetics with precision
preparation and reliable cementation.**

- Understand smile-design principles, composite mock-ups and diagnostic wax-ups to guide minimal-prep veneers.
- Learn trial-smile workflows that enable conservative tooth preparation and predictable outcomes.
- Gain a full overview of veneer preparation designs, temporisation & robust adhesive bonding techniques.
- Explore adjunctive techniques such as cosmetic orthodontics and edge-bonding when veneers alone are insufficient.
- Engage in hands-on veneer preparation and bonding workshops.

09

Prep Course

3 - DAY
COURSE

Complete 3 days with any one of the 2 choices below:

- Attiq Rahmans Anterior prep OR Posterior prep course (3 days)
- Sherif Elbarbarys Verti & Beyond course (3 days)

1

Attiq Rahman

You are required to complete either the Anterior Prep Masterclass OR the Posterior Prep Masterclass.
(FAQ: You are not required to do both courses for the purposes of the diploma)

Either of these courses will also be eligible towards the diploma if you have completed it within the last two years.

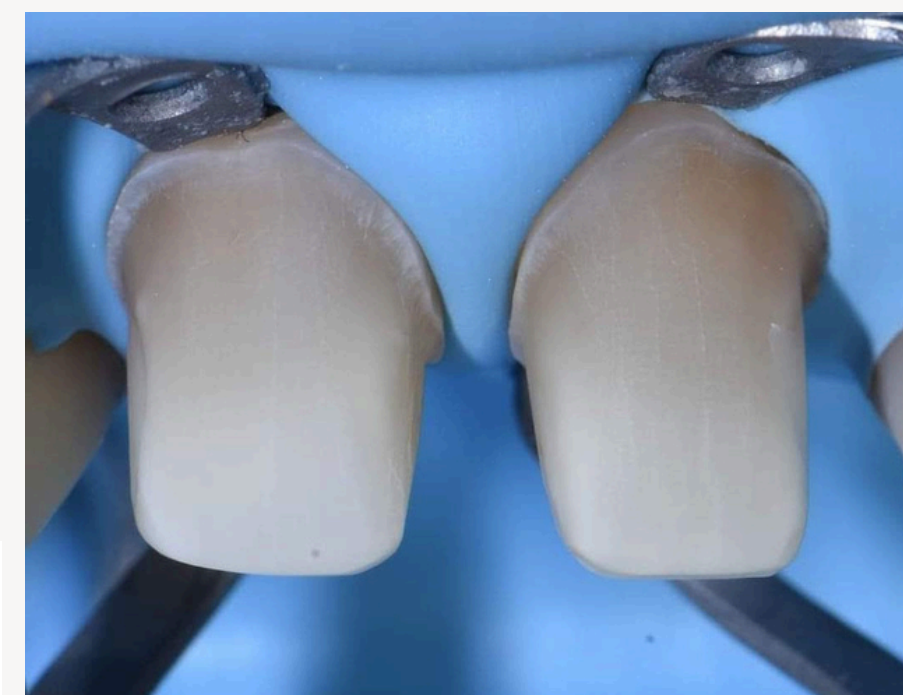

2

Sherif Elbarbary

You are required to complete the Prep Master Course (Verti & Beyond).

This course will also be eligible towards the diploma if you have completed it within the last two years.

10

Bridge

Master Adhesive & Conventional Bridge Design
Elevate your prosthodontic expertise in one focused day.

- Understand the full scope of bridge treatments: indications, design, retainers, connectors & pontics.
- Master communication with the laboratory and learn how to write effective lab prescriptions.
- Explore protocol for resin-bonded, zirconia and conventional bridges including bonding strategies.
- Deep dive into clinical longevity: maintenance, consent, failure analysis & how to reduce de-bonding.
- Gain insights into complex scenarios: long-span bridges, mobile teeth, implant-supported bridges and hybrid designs.
- Review real-life case discussions: delegates can bring their own complex cases for review and discussion.

I - D A Y
C O U R S E

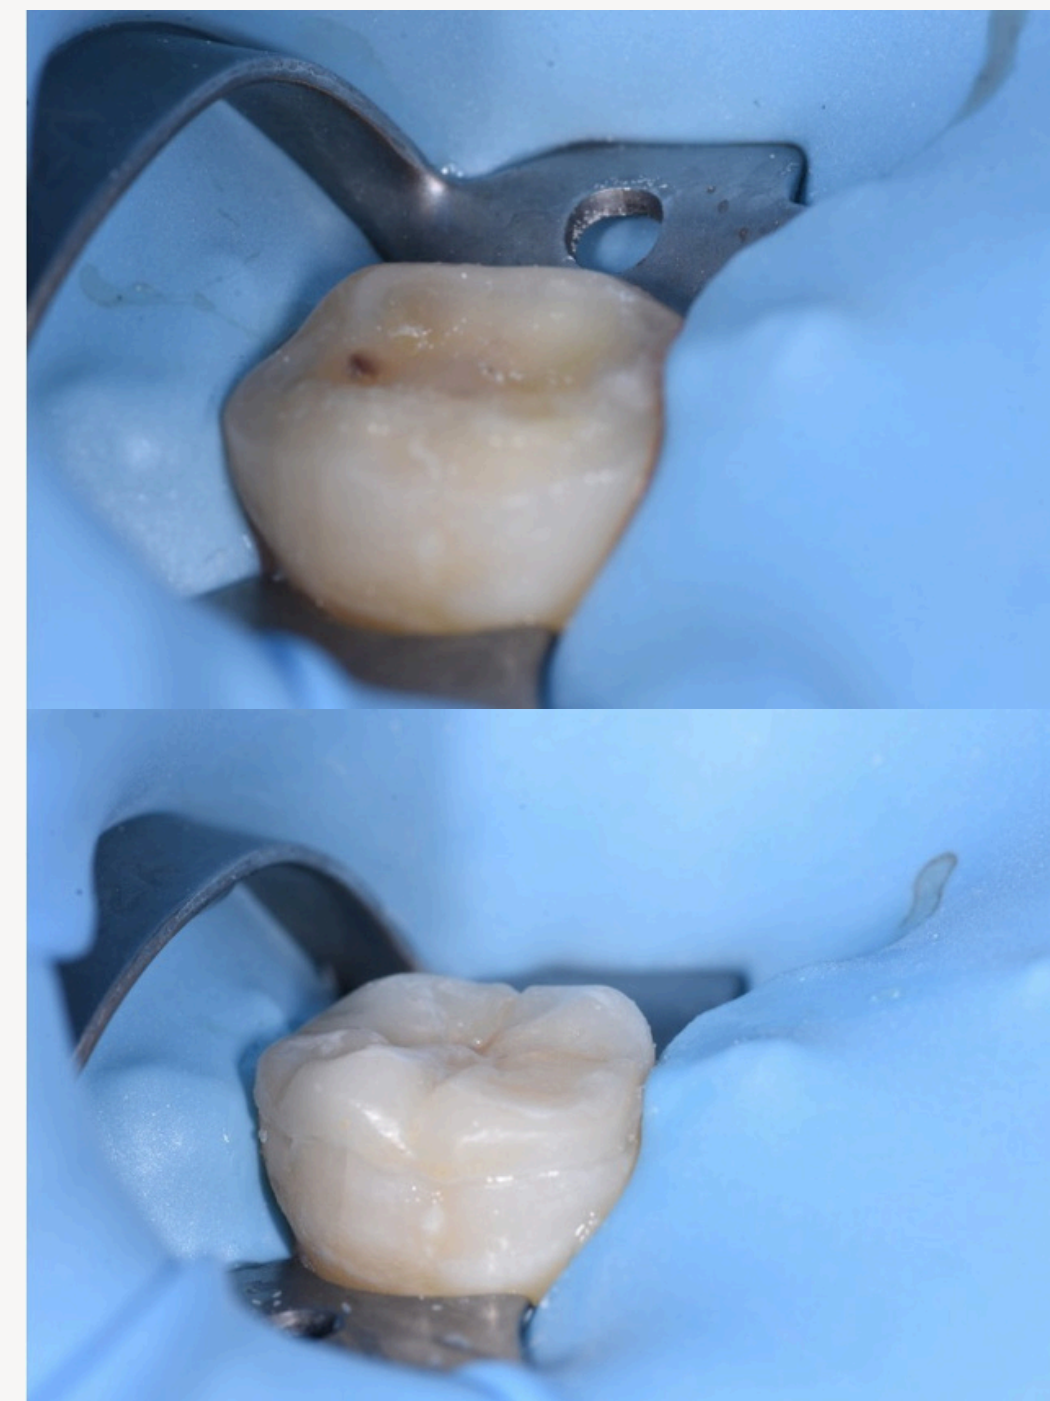

11

Posterior Overlays

2 - DAY
COURSE

Elevate your posterior restoration game with modern onlay workflows. Re-imagine the approach to indirect posterior restorations and master the adhesive workflow.

- Day 1: Decision-making process — when to choose overlays vs crowns, preparation designs and finish lines.
- Day 2: Hands-on majority (> 75% practical) covering temporisation, isolation techniques (rubber-dam), bonding protocols and onlay placement.
- Learn to integrate adhesive strategies, modern materials and lab-communication essentials for reliable outcomes.
- Bring your own case photographs and radiographs for discussion and tailored feedback from the faculty.
- Small-group format ensures high interaction and direct mentorship — real cases, real skills.

12

Removable Dentures

2 - DAY
COURSE

Complete 2 days with any one of the 2 choices below:

- ACE courses (2-days)
- Finlay Suttons denture course (2-days)

Master Removable Prosthodontics with Hands-On Confidence. Gain practical expertise in both partial and complete denture workflows — from prescription to delivery.

- Full theoretical review and decision-making for both complete and partial dentures.
- Hands-on lab and clinical sessions covering impressions, try-ins, adjustments and finishing techniques.
- Learn effective communication with the dental laboratory – drafting prescriptions, managing design & material choices.
- Understand referral & case-planning protocols, patient consent, maintenance and complications management.
- Bring your own cases for discussion—receive expert advice tailored to your practice.
- Small-group format to ensure practical time and direct faculty interaction in a high-quality environment.

1

Sandeep Mukar

Course Provider:

ACE COURSES

This course will also be eligible towards the diploma if you have completed it within the last two years.

2

Finlay Sutton

You need to complete two courses with Finlay Sutton:
Course 1: Partial Denture course (1-day)
Course 2: Immediate denture course (1-day)

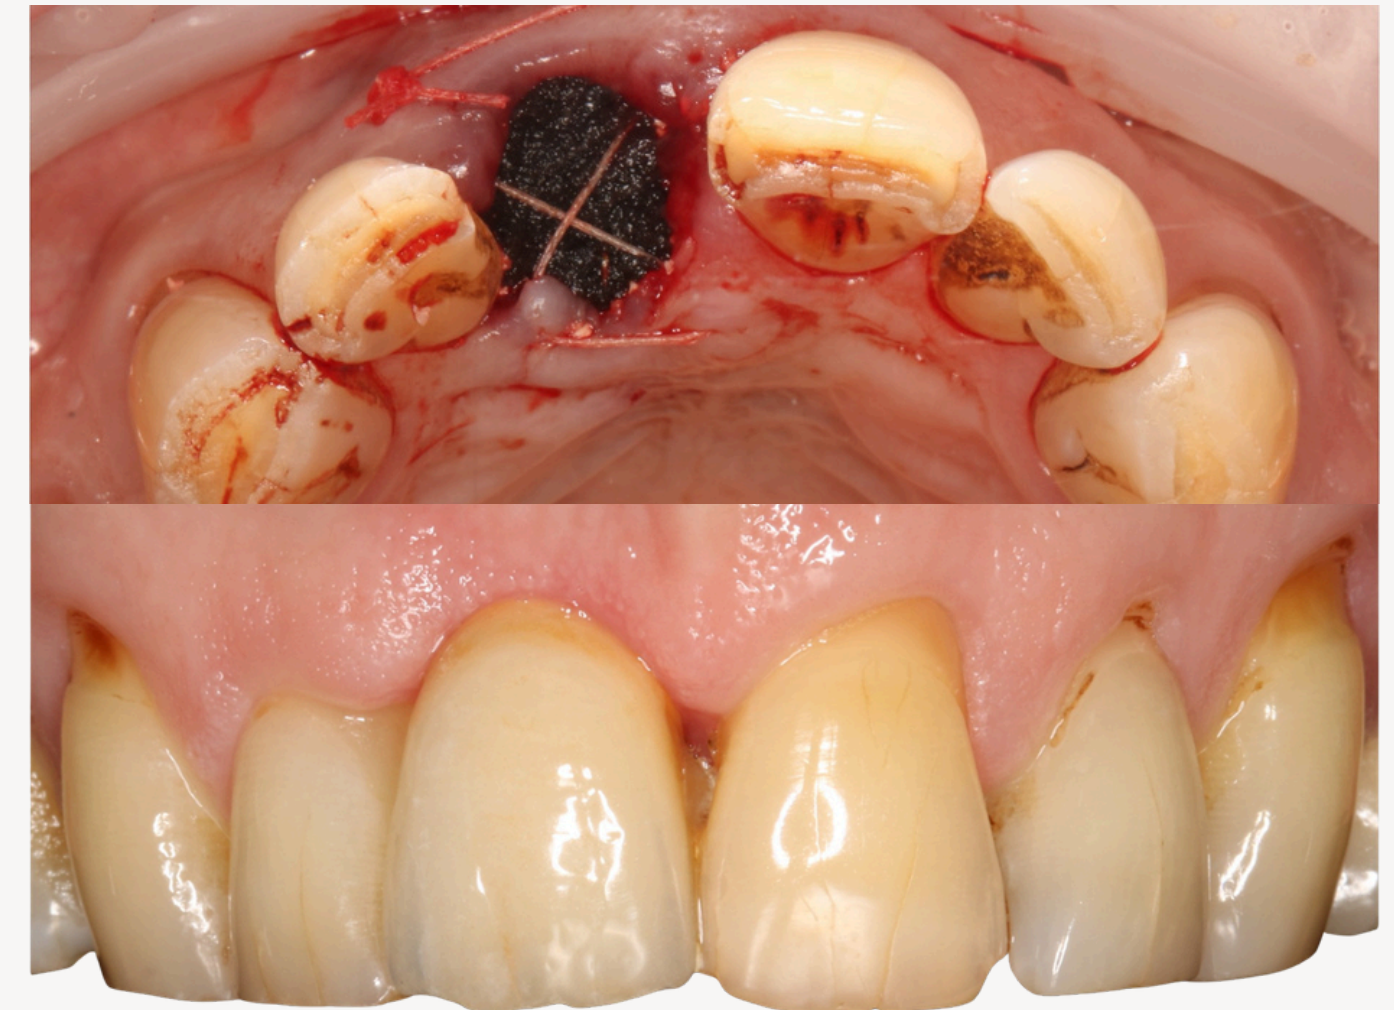

These courses will also be eligible towards the diploma if you have completed them within the last two years.

13

Socket Preservation
& Dental Implants

From Extraction to Restoration: A Full Spectrum Implant Workshop Advance your implant-dentistry workflow with hands-on experience and evidence-based guidance.

- Day 1 AM: Indications, risk factors, implant terminology, extraction timing (immediate / early / delayed) and CBCT fundamentals.
- Day 1 PM: Socket-preservation techniques — indications, biomaterials, hands-on model work and suturing.
- Day 2 AM: Surgical-stage implant placement — planning the three critical positions, guided & digital workflows, hands-on placement and suturing.
- Day 2 PM: Restorative implant workflow and maintenance — healing caps, impression copings, abutments, scan-bodies and long-term patient management.
- Small-group, case-based environment with delegates of all levels and interactive discussion of real-clinical scenarios.

2 - DAY
COURSE**Exemption:**

You are exempt from this module if you have completed a Certificate or Level 7 diploma or MSc in Implants from ANY provider

14

Ortho-Restorative

Complete 1 day with any one of the choices below:

- IAS Academy 1 day Ortho-restorative course (inn person)
- Invisalign Go
- Invisalign Comprehensive
- 32co aligners

1
ias
ACADEMY

Tif Qureshi

10% discount for ACE diploma delegates - contact Will @ IAS

This course will also be eligible towards the diploma if you have completed it within the last two years.

2
invisalign®
32Co

Anyone practicing Invisalign Go or Invisalign Comprehensive or 32co aligners (with the accredited certificate) is eligible.

You therefore don't need to complete additional courses to fulfil the requirements for this module of the diploma.

1 - DAY
COURSE

Exemption:

You are exempt from this module if you have completed a Certificate or Level 7 diploma or MSc in Orthodontics from ANY provider

15

Advanced Treatment Planning & Posterior Crown Lengthening

2 - DAY
COURSE

Multidisciplinary Treatment Planning and Surgical Integration. Elevate your restorative practice by mastering complex case planning and surgical access techniques.

- Day 1 AM: Patient-journey overview with a focus on multidisciplinary case management (ortho, perio, endo, pros, implants, dentures) and managing clinical scenarios such as over-eruption, impacted 8s, cracked-tooth syndrome, intrusions/extrusions.
- Day 1 PM: Case-planning workshops where delegates work on real cases, incorporating complex treatment plans and patient communication of options.
- Day 2 AM: Comprehensive review of periodontal management in general practice, including hygienist pathways, non-surgical and surgical periodontal care, and profit-improving strategies.
- Day 2 PM: Posterior crown-lengthening session—diagnosis of deep carious lesions, decision between deep margin elevation vs crown-lengthening, live demo and hands-on pigs-jaw exercise.
- Small-group format ensures active discussion, hands-on experience and direct faculty feedback.
